eBay digital ban hit me hard...But not anymore!

Hi Paul,

I've been a long-time newsletter reader of yours. As you already know, the eBay digital ban hit us all very hard. I had an \$2,000/month income stream that completely vanished the next day...

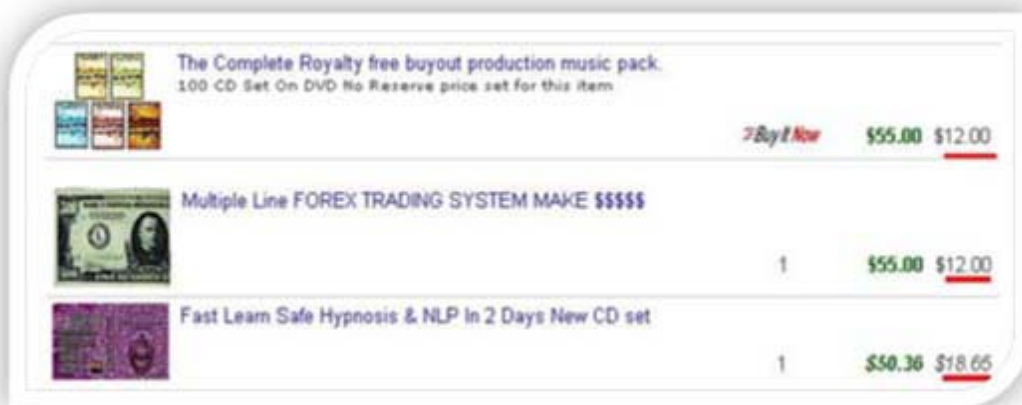

Not anymore! In fact, I am currently pricing all my physical CD/DVD infoproducts at 50% higher prices and getting the same amount of purchases and it's completely automated!

Thanks Paul, you rock! This software comes at the right time for all eBay sellers!

Benjamin Roth

You must be thinking... "**sounds nice, but...**" am I right?

I can show you my PayPal account with MONEY Proof but proof can be easily manipulated and people have lost trust in them. So, here are some live examples that CD/DVD products SELL!

Who wouldn't want to **set up profit pulling auctions** like these and make sales every single day on complete auto-pilot? I certainly would!

Note: As you can see in the picture above you may charge as much as \$12 to \$18 for shipping for every CD/DVD you sell on eBay!

NEWS FLASH! It costs ONLY \$1.75 to create, burn, package and ship the item to your customers doorstep using the Auction Acrobat software along with Kunaki services. Since shipping is paid for by your customers anyway, that \$1.75/per item is your 'hard-cost' and you only pay it if you sell your product! No monthly fees, No minimums to pay, or Hidden fees.

Bottom line = more money in your pocket!

You do not have to touch a single button once everything is set up. Auction Acrobat does everything from take orders, saving the customer information on your server, sending the customer email and name to your autoresponder and kunaki will create, burn, package and ship the CD/DVD to your customers doorstep.

It is 100% Automated!

Check out the copies of the order confirmation emails I receive in my inbox **every single day!** This further proves that there is demand for these products...

" Ten Reasons Why Auction Acrobat Can Help Your eBay Business "

Aside from the fact that you don't need a product of your own or the fact that you don't need any marketing skills to sell on eBay, here is what makes Auction Acrobat revolutionary...

- 
Works in every country that eBay supports - No more restrictions! Sell where you want, when you want. Do you have a CD/DVD product targeted to a specific country's audience? No problem, list and receive payments within minutes...
- 
Sell physical CD/DVD's on autopilot - Physical products can be homestudy courses, public domain material, tutorial videos, software, infoproducts with resale rights and other information products.
- 
The software setup takes less than 5 minutes and there are a maximum of four lines of PHP code to edit. We have designed the script keeping the newbie users in mind.
- 
Capture buyer's physical address if you are interested in direct mail marketing - This is a great way to build a loyal high-end customer base. Currently, this is the hottest communication medium that the million dollar businesses are using.
- 
Capture buyer's email and add it to your auto-responder or use in a safe way you wish for future promotions - this can be the real cash cow!
- 
100% Compatible With Aweber and GetResponse - there are no forms to fill, no code to edit. All the leads will be automatically added to your autoresponder!

- ✓ **Sell unlimited CD/DVD products on eBay**- You can add as many products as you wish within minutes. No more testing, tweaking or other mundane tasks. (Setup once - sell forever!)
- ✓ **Allows MULTIPLE product purchases on eBay through one auction listing** - Sell multiple items and pay less for shipping in kunaki (special multiple item discounts). Now, you can offer shipping discounts and destroy your competition!
- ✓ **100% integration with PayPal** for your convenience and easy payment options using eBay. eBay swears by PayPal and why wouldn't it? It bought it after all!

Point. Click. Deliver. It's That's Easy!

Easy 4 Step Easy Installation Process

One of the greatest problems with software products is that they are designed by geeky programmers who will only go as far as to make the software work. But remember, we are marketers, we are interested in making money not wasting time figuring out code. This software achieves just that.

Warning: Advanced Acrobatic Features Ahead!

If you have tried selling on eBay or have an existing eBay business, you know that it is a competitive but very profitable marketplace where the more 'up to speed' you are with things, the more successful you generally are.

A fair warning here, these are advanced features. You don't even need them to have success with this software, but these were requested by the "elite" eBay sellers because we wanted to make the most money possible using this software. We just didn't do a software that is "half-baked" and sell you a "better" version on the back-end. This is a **complete** software.

Some amazing advanced features of Auction Acrobat are:

- ✓ **Supports Multiple eBay Accounts** - Literally setup multiple eBay accounts with multiple auctions and you don't need another install, it is all done in a **single** install.
- ✓ **Adds the first name AND last name** of the buyer even if it is a PayPal Business account to your Aweber/GetResponse campaign automatically.
- ✓ **Adds the "primary" PayPal email address** (the one that is checked the most, this is usually the support email) to your Autoresponder automatically! - *personal note*: this is the most responsive list and the open rates are amazing!

- ✓ Supports almost **every** eBay country.
- ✓ Supports **any** currency.
- ✓ The software is setup in such a way that even if eBay changes something, it still functions flawlessly! **No more "short-term" solutions that work for a while and stop working** when you most need them!
- ✓ **You can finally upsell your customers** immediately after purchase! (The time they are most responsive to your emails and offer)
- ✓ **New Addition: brand new** tutorial videos that show how to profit from this software using 3 awesome built-in marketing features of the software. You literally may never have to worry about paying for your eBay and PayPal fees ever again because these 3 features make you enough profits to offset these costs

If you've been dreaming of finally "going for it", and changing your life accordingly... this is probably one opportunity you should jump on, right now. I hope your marketing efforts are working out for you. I know they're already working out great for those folks who've been listening to me...

Auction Acrobat Is Unique and Nothing Like You Have Ever Seen Before!

100% Secure Interface!

We have custom built Auction Acrobat to suit the needs of newbies and advanced ebay users alike. Auction Acrobat has some unique features that will make it extremely easy and flexible for you to customize your auctions exactly the way you want it!

- ✓ **Sell multiple items through one auction listing** - example: When someone buys two, three or more items from a single auction, the order is sent to kunaki as "one sale." This way the vendor receives a special discount from Kunaki on the shipping price = more profits in your pocket!
- ✓ **Ability to use special "wild card" characters in the eBay auction title** - for example you may use '*', '#' or anything you can think of without any problem = more flexibility and freedom to sell your product the way you like.
- ✓ **Logs all the customer order information in one file** - no more scrambling and searching hundreds of text files = easy access to all information, saves time and effort.
- ✓ **Fraud Protection** - Sometimes, when automation is in place, some buyers will 'commit to buy' your product but will not pay for it and once your product is shipped, it will cause all kinds of problems. So, we incorporated a neat feature where the product gets shipped **only** if you receive the full payment to your PayPal account.
- ✓ **Put your complete eBay business on autopilot** - with Auction Acrobat, you can make sales even when you are not at home, even if your internet connection goes down!

Hey Paul -

Digital goods on eBay just got automatic again!
Thanks buddy!

I have to admit I was sad when eBay made us stop selling digital goods. I don't want to spend my days putting labels on CD's and shipping them out in little padded envelopes. That stinks.

Your software makes selling digital goods on CD as simple as selling eBooks used to be.
AWESOME!

Also - tell your customers that I know for a fact that a CD or DVD buyer is a FAR BETTER LEAD than an ebook buyer! It's a proven fact.
