Virtually Eliminate Your Power Bill While Saving The Planet

Are you ready to STOP PAYING FOR POWER?

Do you want to preserve the natural resources of our precious planet?

With my step-by-step instruction manual, you can SLASH YOUR UTILITY BILL or even eliminate it completely by generating your own electricity.

Alan Hopkins - Mechanical Engineer
President - FreeEnergyOptions.com

Hi, my name is Alan Hopkins and I have spent the better part of my career studying wind and solar power for the US Government and major electrical companies. For the first time ever, I am sharing what I have learned. **Utility companies are charging you way too much for power!** They know that they can set the price as high as they want and millions of people will have to pay it. You need electricity and you have no other way of getting it, right?!

Wrong! I am here to show YOU a better way.

Do I have your attention? This is a serious chance for you to drastically reduce your monthly expenses. It's even possible to **earn money from the power company.** That's right, my step-by-step fully illustrated manual will show you how to harness the forces of nature to generate your own **FREE ENERGY.** When you produce excess energy, the power company may even pay you!

Are you ready to **VIRTUALLY ELIMINATE YOUR POWER BILL WHILE SAVING THE PLANET?** Here is your opportunity to do your part in helping preserve valuable natural resources. But, even more of a benefit to you is that you will be able to **REDUCE YOUR POWER BILL** by as much as 80% and in some cases **COMPLETELY ELIMINATE IT!**

Why Keep Paying For Electricity...Instead, Let The Power Company Pay You!

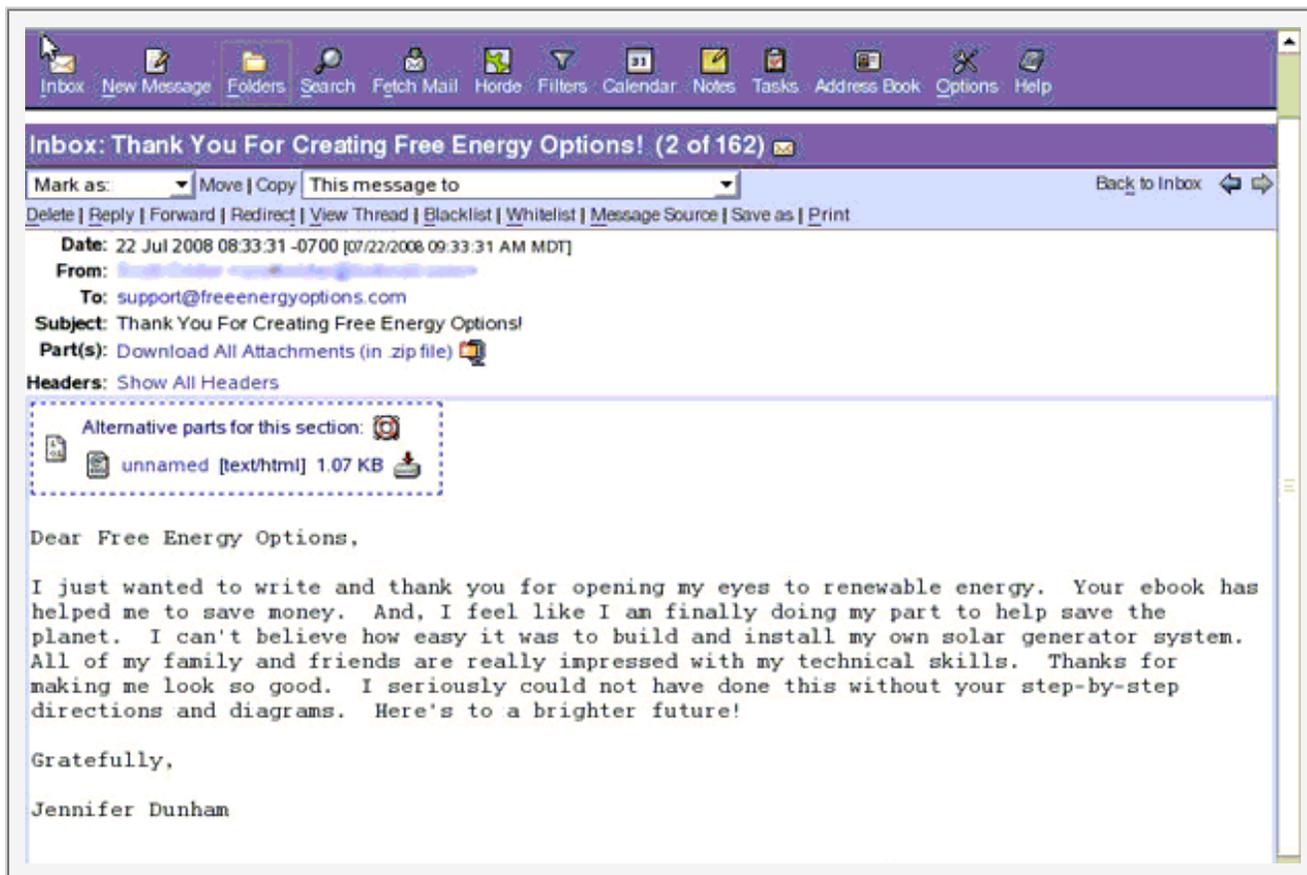

It's time to turn the tables on your most costly bills! **With the Free Energy Options manual you will quickly learn easy and inexpensive ways to use Wind and Solar energy to your advantage.**

Maybe you have seen solar panels used by businesses or wind farms along the highway. But, there is no reason why every individual cannot have access to such valuable information. With Free Energy Options you will be able to **build your own Solar Generator and/or Wind Turbine today.**

Are you interested in how this really works? **My fully illustrated step-by-step manual will show you how to build a system to suit your individual needs for \$200 or less in raw materials.**

But don't take my word for it on this one...

Here are a few letters from people who are now SAVING BIG \$\$\$ and HELPING THE ENVIRONMENT after following our manual:

Hi There,

I am sending this email to say thanks. Free Energy Options was so easy to understand and use. I was able to get started building my own wind turbine right away. In one weekend, I built and installed the whole thing. Right now, I am running my washer and dryer on the power that I am able to generate! Since it has only been a couple of days, I am not sure of the amount of money I will save on my electricity bill. But, I am sure that it is going to be a big difference. I will let you know when the bill comes how much I saved. For now, thanks again and keep up the good work.

Sincerely,
 Jenson Rogers

Dear Free Energy Options,

Wow!!! I have to say that I am a big supporter of renewable resources and alternative energy options. When I purchased your manual, I was skeptical as to whether or not your system was legitimate. So, I put your manual to the test. I used every tip for getting free solar cells and other parts. My solar generator is up and running. Next I plan to build a wind turbine. Because of your help I am one step closer to going "Off Grid." Again, I am really surprised at how easy this was.

Once I have exhausted all the projects in this manual, I will be moving on to your Simple Water Car manual. Do you have any more green products I should be aware of?

Thanks Again,

Jeff Richards

I've set up the Free Energy Options system to be **simple, straightforward, and easy-to-use**. In fact, if you can't set up your own renewable energy solution for **less than \$200**, we'll refund 100% of the purchase price.

My step-by-step manual will show you how to build your own Solar Power System AND Wind Power System for under \$200!

How is this possible? Sunlight and wind are forces. A force can be converted in any kind of energy using the appropriate technology.

Why would I want to use Wind and Solar Energy? Wind and Solar power are called Renewable Energies. This means that **this kind of energy is impossible to exhaust** because it is generated by natural forces, instead of being created from a controlled reaction like burning fuels or nuclear material. One day we will run out of oil. We must change our habits now, before that happens. I have listed just a few benefits you will gain from Free Energy Options.

Your Electricity bill will be greatly reduced, if not completely eliminated.

The system will pay for itself within a month or two.

The money you save with Free Energy Options will be yours to spend or save!

Doing what you can for the environment is great, and your children and grandchildren will be proud of your actions.

Knowing that you are doing your part to help solve the energy crisis is a great feeling.

What exactly is included in the FreeEnergyOptions.com manual?

When you place your order below, you will IMMEDIATELY receive the entire Free Energy Options system. Our guide is **up-to-date as of August 2008** and was written by THE top expert in the field. It includes step-by-step instructions and full illustrations **easy enough for even a novice to follow**. You don't need to be an engineer or have a bunch of special tools to build your own Solar Power System and Wind Power System and save a ton of money on rising electric bills. WE GUARANTEE IT!

Here's what you will receive...

Complete step-by-step instructions to make your own solar power generator, including blueprints for a 200-watt solar panel and all the different configurations possible.

Complete step-by step instructions to make a professional grade 1000-watt windmill, with detailed diagrams and instructions, using easy-to-find material.

Maintenance and legal information about your new power systems. This is important if you wish your system to stay operational for the years to come.

General tips on how to save money on gas and electricity. Applying simple tips found in our eBook can reduce your energy consumption by 30%!

Secrets to locating the cheapest deals for your materials and parts. Some of them can even be obtained for free!

How Much Does This Cost? How Much Will I Save?

Now you have a decision to make.

You can continue to pay high electricity bills that drain your bank account and use valuable resources that we can never get back.

Or, you can become part of the solution to **VIRTUALLY ELIMINATE YOUR POWER BILL WHILE SAVING THE PLANET!**

My system will save you several thousand dollars per year!
