From: George Brown

Dear Smart Marketer,

You're tired of searching for it.

The secret, I mean.

The secret behind making serious money online.

You know what I'm talking about - the secret that's been promised to you ever since you discovered internet marketing...

Well don't worry. I'm going to reveal that exact secret to you in just a second...

And no that's not some kind of trick - I'm going to reveal the biggest secret in IM to you right here, on this page, in just a few paragraphs.

This secret is so simple to grasp, you won't believe it.

In all honesty if you knew how easy it was to really make big money online, you wouldn't even be reading this right now. **You'd be too busy getting rich.**

Before I let you in on the secret though, I'll tell you how I stumbled onto it...

... and get comfy - it's quite a ride...

Hi - I'm George.

I'm 18 years old, and I've been a full time online marketer for just over a year.

Before that I was a furniture mover.

That was my first job out of school... shifting people's stuff when they move house...

Great career choice huh?

There's me on my first day, 130 lbs soaking wet...

And they expect me to carry an 80lb TV up to the sixth floor of an apartment building...

Can you imagine?

And it just got worse...

Every job was emptying yet another apartment. You get a house you got an easy day.

*that's my old business card.. yes
I really was a furniture mover!*

I know that doesn't sound so bad, but here's the kicker:

Apartments have elevators, and 95% of the time, the elevator's out of order. Or the guy's 19 seat leather sofa won't fit inside it...

So you have to carry it up the staircase... all day, every day, dragging all this heavy stuff up and down staircase after staircase.

Lemme tell you, it's just backbreaking - if you've ever done manual labor you won't need me to tell you...

Some days you finish up work and you can barely walk... 8-10 hours every day lifting, grunting, bending and straining

I had so many aches and pains you'd think I was 57, not 17...

And boy, I hated every second of it.

I mean, who wouldn't? Who wants to break their back every day and take home less cash than it takes to fill their gas tank?

But that wasn't even the worst thing...

**"All The Back Pain And Popped Knees In The World
Are Better Than What Happened Next..."**

This one time, we had to move this guy's stuff all the way across the country. And man, he had a lot of stuff - flatscreen TVs, monster stereo, a ton of computer equipment, the whole 9 yards...

So I spend all day heaving the stuff downstairs -**the elevator's out of order of course-**

And then I have to fit all this stuff into one truck!

What's worse, I'm stuck driving the truck for literally an entire day...

So guess what happened when we got to his new home and started to unload?

His stuff was ruined... just about every last thing was completely trashed...

... and it was totally my fault! I'd overloaded the truck and forgot to tie the safety lines...

Man, I broke just about every valuable possession the guy had...

So I had to pay for it.

It took months...

Months of giving up every last cent of my paycheck to my boss.

It was just about then that I realised I had to find another way to make money...

So I started looking online...

You Know How That Goes... Just Throwing Dollar After Dollar At Some Crazy Fantasy...

And let me tell you, I was every guru's dream...

I discovered internet marketing. And I bought just about everything I could get my hands on... ebooks, video courses, big mail order courses, anything that looked like it could make me a buck...

I was desperate to make more money and break out of that life... you know how that feels right?

Trouble was, all my attempts at actually making money were failing.

Spectacularly.

It's easy enough to buy the products... but making money from them was a lot tougher.

And to be honest, it was really hard to stay focused... I worked at it in the evenings, and it was a struggle to stay awake because I was so tired from doing heavy lifting all day.

Sometimes I even stayed up all night... hunched over my keyboard drinking coffee like a crazy guy... desperately hunting for the one thing that would set me free. But before I knew it the sun would come up and I'd have to get ready for another day's hard labor.

Ever been there?

It's like a crazy, exhausting vicious cycle...

I won't even mention how much money I dropped when I discovered Adwords...let's just say it wasn't just my shirt that I lost.

But Then Something Odd Happened...

I actually made some money!

I'd been experimenting with SEO, and working on this particular site for months...

And when it started to rise in the SE rankings, I got a handful of Adsense clicks...

It wasn't much money - literally about 16 cents... but it was enough to show me that there was some potential with this stuff.

So I did some more tweaking, and sat back and waited for the clicks to flood in... surely once I'm getting good ranks, some more hard SEO work will bring in a ton more traffic right?

Wrong... it just never happened...

The site disappeared from view... it had been slowly rising through the search engines, but for some reason it just took one long nosedive and never came back...

Months of work for nothing.

And that got me thinking... I was obviously doing something right at first, because the site moved up in the SERPs.

But then something else I did cancelled it all out. Big time.

What if I could somehow separate the things that worked from the things that didn't?

So I started experimenting - new sites, different niches, all different techniques.

To my surprise, the sites that were the simplest and easiest to set up were the ones that saw the most success...

It wasn't long before I had a site that was actually getting traffic and making regular money. So I pulled out the Adsense and replaced it with affiliate links.

That's when I started to make real money...

I made \$600 that month, so I instantly started work on more sites like that...

**And That's When It Hit Me...
I Finally Got The Secret To Online Profits...**

Remember when I told you the secret was simple?

Well it is.

It's so simple it was staring me in the face.

And right now, it's staring you in the face too...

The "Secret" To Making Real Money Online....

Find a simple method that makes a little cash, turn it into a system, then work that system like there's no tomorrow...

So that's what I did...

After a few months I was making enough to quit my job...

That's when I really got the system down...

It wasn't long after that when I broke the \$10,000 a month barrier...

Here's a screenshot I took on a random day back in April, which had been my sixth 5 figure month in a row:

The screenshot shows the ClickBank Transaction Search interface. A red handwritten note says "My Sixth \$10k+ Month In A Row" with an arrow pointing to the total amount. It goes without saying therefore, that I recommend anyone even remotely interested in making money on online to get this. George has done just an amazing job here and I can't imagine anyone NOT making money with this.

I realised then that I was onto something.

Now I'd also come across plenty of people in the Internet marketing forums who were crying out

for a reliable system that would help them make money.

So I released it as a special offer in the worlds largest IM forum, the Warrior Forum.

And it went crazy. I sold over \$20,000 worth in 2 weeks...

It Even Took The Warrior Forum By Storm.. That's Almost 20,000 views!

"today I've got 20 such sites on the market that have made me \$4,200+ in just one month"

Hi everyone,

My name is Swastik. I bought George's Google Sniper system when it came out to the market for the first time. I implemented what was written, had 2 sites going on at that time. As George had said, they'd outrank their competition in due amount of time.

I was waiting for it, and after 5 days, one of the website was on the first page of Google, 3rd rank for a keyword with around 20,000 competition and 3,000+ searches a month. I was getting decent traffic, and after a few days, I started seeing sales come in!

Same with the second site. I scaled this up and today I've got 20 such sites on the market that have made me \$4,200+ in just one month.

I can only imagine what this can do for me when scaled up more!

I specially liked your tips on LSI keywords. This is the best system you can invest your hard earned money in, and if you implement it, you will make money, no matter what.

Take my word for it.

Thanks,

Swastik Agrawal, India

And Swastik's is just one of the success stories from that release of Google Sniper.

People all over the world who've never seen success before are suddenly making their first profits online using this system...

And do you know why?

Because it's a complete business package...

You get everything you need right there, by instant download.

I'm not going to tell you that you need to pay out for expensive web designs or SEO services

You're not going to suddenly find that you have to drop \$500 on Adwords to test an idea...

No chance. Because there's no further cost.

You get everything you need in the package. And not only in the Google Sniper manual, but you also get 8 hot video modules...

So you can read how it's done in the manual, and then I'll take you by the hand and show you the whole process on video...

What's easier than copying while you watch someone else do it?

Let me tell you, it doesn't get much simpler than that...

I'm revealing all my secrets - every single thing I used to generate over \$15k a month less than 12 months after discovering Internet Marketing...

You're getting secrets like this:

How to write killer presells... the traffic I send to the vendor pages is so hot that some of it converts at over 22% - imagine 1 in 5 of your visitors turning into a sale!

Watch & copy me as I uncover profitable keywords using my techniques live on video...

How to speak to your market so they think that you're "one of them"

The 3 questions you need to ask yourself in any market to really connect with your visitor and jack your conversions sky high...

How to generate tons of traffic from keywords you're not even targeting...

Where exactly to put your affiliate links...not only to get the most traffic, but to convert the highest amount of visitors into sales...

How to get the whole thing started without doing any keyword research at all...

The instant way to tell if you can quickly outrank another site...

The 4 features you absolutely must have in a profitable keyword...without these you'll fail...

Why you sometimes need to completely ignore Google's estimated search numbers...

What to look for on Google's first page – if these 2 things are there, you can definitely outrank the competition.

The one thing your presell pages absolutely must have... or you probably won't make anything at all.

Are you starting to see the power here yet?

Just check out this one site I built other day... took 2 hours to setup and that was it.

I never touched it again.

Today, it's been #1 on Google for months making me around \$50 every single day.

↓ Real Case Study! ↓

#1 On Google With No Backlinks Whatsoever. It Literally Took 2 Hours To Setup And I Never Touched The Site Again!

The screenshot shows a Google search for "groom wedding speech". The search bar is at the top. Below it, the search results are displayed. A red circle highlights the first organic result: "Groom Wedding Speech" from "www.groomweddingspeech.org/". A red arrow points to this result with the handwritten text "There's Me :-)". Other results include "Wedding Speech Database", "Groom Speeches", "The Groom's Wedding Speech", "Groom wedding speech" (Sponsored), "Funny Wedding Speeches", and "Groom Wedding Speech" (Sponsored).

And Check Out How Many Searches That Keyword Gets Every Month... Almost 10,000 In July

Keywords	Advertiser Competition	Local Search Volume: July	Global Monthly Search Volume
Keywords related to term(s) entered - sorted by relevance			
groom wedding speeches	<input type="checkbox"/>	9,900	8,100
grooms wedding speech	<input type="checkbox"/>	1,000	2,400
<u>groom wedding speech</u>	<input type="checkbox"/>	<u>9,900</u>	<u>8,100</u>
grooms wedding speeches	<input type="checkbox"/>	1,000	1,600

Picture this...

You spend 2 or 3 hours building your first Google Sniper site today...

And then you build another tomorrow. Then one the day after. And the day after that.

Pretty soon you've got 8-10 sites, each one bringing you three or four hundred bucks a month.

And each one took just 2 hours to set up...

That's a \$4000 a month recurring income, from just 20 hours work.

Not 20 hours a week, 20 hour's total work.

I'll bet you work more than that in a week usually don't you?

I know I used to when I worked as a home mover... man, a 20 hour week would have been a vacation!

But here's the best part - sure, you can put in 20 hours or so and build a \$4k/month income...

But you don't have to do anything else...there's no further promotion needed with these sites.

No link building, no traffic generation. Nothing.

I'm not going to tell you to set them up and throw Adwords cash at them, or get into some stupid linking campaign. I mean, who has the time to build links to their sites all the time?

That Stuff Just Isn't Going To Work - You're Wasting Your Time, And Here's Why...

Let's say you need to spend a couple hours a week link building for your sites. And that's realistic - if you want linking benefits, you need to do it consistently...

What happens when you've got ten sites? Or 20 sites?

Are you honestly going to spend 40 hours a week commenting blogs and all that other stuff?

Of course not. That's crazy.

And that's why I wanted to make sure none of that stuff is involved. I've literally given you everything you need to get started - this is a totally self contained business.

**"You'd Do Very Well To Learn
From Someone Like George "**

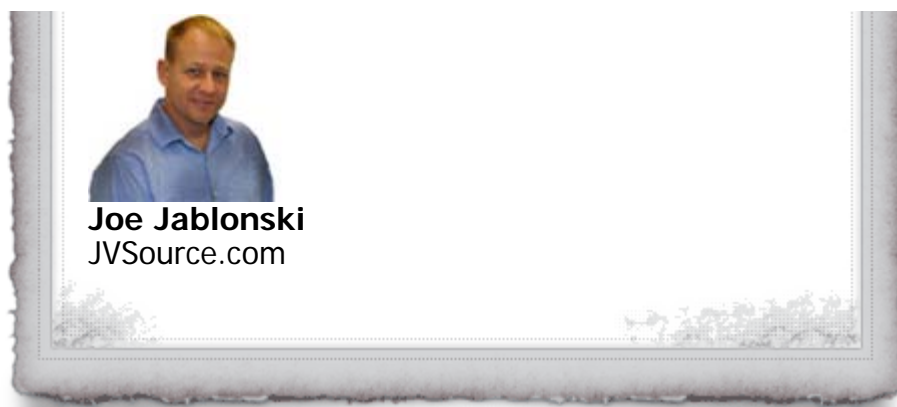

Hey,

**Joe Jablonski here, Mike Filsaime's JV and
Affiliate relations manager...**

I can say that George is one of the most honest and sincere people I've ever met, and when it comes to making money online he really knows his stuff!

I've learned some great information from George, stuff I plan to use in my own Internet Marketing Business. Particularly to do with SEO, some of the stuff he teaches is just mind boggling.

You'd do very well to learn from someone as dedicated and knowledgeable as him.

I'll show you how to pick your keywords, how to set the site up (and man, it's super simple), where to put your affiliate links, and boom, it's done.

You could literally be making money from this thing today.

But listen... I know what you're thinking.

You're thinking that all the best keywords are already taken, and the others are running out fast right?

Let me tell you, that couldn't be any further from the truth.

Reality is, there's millions of easy to grab, profitable keywords out there. Millions.

And once you know my secret techniques, you'll be able to grab them at will.

When you can find profitable keywords at will, you or your family will never struggle for money ever again.

Good keywords are that powerful...

Check out some of the secrets I'm giving up about my keywords...

The kinds of keyword you must stay the hell away from...

The exact number of searches a month your keywords must have...

The exact # of competing pages you need to look out for...

How to use Yahoo answers to get super hot in-demand keywords for free...

How to use LSI keyword techniques to really kill your competition...

Where to find massive lists of the exact LSI keywords Google wants to see on your site.

How to use free keyword tools to get the biggest keywords at no cost

How to naturally use your keywords in your pages

Once you see my simple 3 step process you'll be able to generate profitable sites whenever you want to...

It's as simple as Keyword>Page>Product.

That's it.

How many sites like that will you build? 10? 20? 200?

It's up to you...

But here's the thing.

The money's great. I mean, who doesn't like making easy money?

But for me, it's all about the freedom. Once you've got sites like this, you're free to do what you want. Go where you want....

Whenever you want.

Because your sites are going to be there making money for you 24/7/365.

Personally, I'm a surfer. I love to surf. It's my obsession.

And my Google Sniper sites have let me catch waves in some of the most exotic places in the world...

Can you imagine a life of total freedom?

Picture it:

You get out of bed whenever you feel like...

Drink a cup of coffee on the back deck, lazing in the sun and watching the ocean...

Then you hit your indoor pool for a couple of laps...

You only "work" when you decide... and by "work" I mean you spend an hour or two planning your next Sniper site...

And you **do it all from your computer**. No travelling to work, no traffic, none of that stuff that drives regular

Took 2 weeks off to go surfing in Fuerteventura with my Dad :-)

On a gliding trip while my sites run on autopilot... (and yes, that is a private airfield)

people crazy.

Then the day's yours... so maybe you surf like me... maybe you like to fish... or scuba dive... just whatever you want.

Heck, maybe you just want to **spend some time playing video games** with your buddies...

Well that's what I'm giving you here... this is **not** just a business plan.

Google Sniper gives you the keys to the kind of life you've dreamed of.

"But Seriously George - How Much Is This Thing Going To Cost Me?"

Before we talk about that, I want you to think about how much money it's going to make you...

It takes just a few hours to get one of these sites done once you've got the techniques down...

And each one can easily make you \$300-\$500 a month.

So imagine you just worked on these sites for one week... treated it like a 9-5 job...

That's 40 hours... in 40 hours you could easily build 20 sites like this...

If you use the completely conservative figure of \$300 a month per site... your 20 sites could be bringing you \$6000 a month

A six thousand dollar recurring monthly income from one week's work?

That's incredible, I'm sure you agree...

But let's be serious for a minute... imagine you worked the system for a month, 9-5 each day...
That's 160 hours, or 320 sites...

320 sites at \$300 a month is a monthly income of \$96,000

That's over a million bucks a year pure profit, from a month's work...

And believe me, there are more than enough hot keywords out there to make that happen. I'll show you how to uncover more keywords than you could ever possibly use...

So a million bucks a year is amazing, but let's be a little conservative here...

Let's say each site only brings you \$150 a month...

That's still \$48k a month - twelve thousand bucks a week...

But what if you're just as lazy as me, and you only build half that many sites...

That's still a \$24,000 monthly income...

I think we both agree- an extra 24 thousand bucks a month is going to seriously improve your life...

So seriously, how much would you pay someone today to be handed a \$24k/month business?

Well, I don't know about you, but if someone offered me a \$24,000 a month business for even as much as \$1000, I'd be climbing over people to get to it...

But thankfully, I'm not asking you for anything close to \$1000...

In fact, not even half...

If you act right now, you can get the whole thing for just \$297...

Think about this - \$77 is a painless amount if you consider what you're getting. You'll make way more than that from your first successful site - every single month!

Listen, to get information this good, you'd usually have to hire some kind of business coach... how much is that going to run you? \$500 a month? \$1000? \$10,000?

But I'm handing you the exact blueprint - videos, manuals, everything you need. It's like having a

coach, but way less expensive, and probably more profitable too...

But you have to act now to get it. Click the button below and secure your spot...

I also understand that your no-questions guarantee make this a completely no-risk deal!

Look, here's the thing...

Right now you've got two choices... you're standing at a crossroads.

You can carry on down your current path...

Probably not making any money online. Wasting money on all those crappy Adwords books... Working an awful job. Giving your whole life to a boss who doesn't appreciate you. And I'll bet he pays you a terrible salary too huh?

And if you continue along that path, it's only going to get worse.

You'll always struggle to pay each bill that comes in, getting a little deeper into debt each time, and further away from your dream

Or you can take the other route...

You can buy Google Sniper right now, and choose to be successful.

And a few weeks from now be making enough money to quit your job. To really tell your boss where he can stick his paltry wages...

And finally give yourself and your family the life you deserve. No more struggling to meet the bills. No more hard times just getting by...

But it won't happen unless you act now, so hit the button below before it's gone for good...

I'm waiting on the other side to help you into the future...

To your success,
George M Brown

P.S. Look, I'm going to level with you here. This is your best bet for making serious online income... it's laid out step by step in the videos, and it won't cost anything at all. No extra costs ever. Sure, you'll need a domain name, but it's such a simple system some guys are already seeing success without their own domains

P.P.S. You really are at a crossroads here. Which way are you going to go? Are you going to choose your old life of misery and money struggles? Or are you going to hit that order button and choose the life where you're already making \$2k a month more this time next week?

P.P.P.S. Think about this- I'm only 18 years old. I'm not the smartest guy in the world - the best job I could get out of school was moving other people's furniture around! If I can use this thing to make over \$15,000 a month, someone with a little smarts or experience could make much more.

But don't forget, if you can't work it, it doesn't suit you, or anything else, I've given you a full no-questions-asked 2 month guarantee. You've got nothing to lose!
