Q: I have never traded the forex market, is Forex Trading Machine for me?

ABSOLUTELY! Forex Trading Machine is a +180 page e-book designed for beginners as well as seasoned traders. Beginners will learn everything they need to know about the forex market, from A to Z. Seasoned traders can jump directly to advanced chapters which teach step by step with detailed charts how to trade the 3 PDFT strategies: Forex Cash Cow, Forex Runner and Forex Flip & Go.

What is the difference between Forex Trading Machine and other forex trading courses?

Simple. First, Forex Trading Machine teaches 100% mechanical forex trading systems that requires absolutely no **discretion, judgment, or interpretation**. It seems that many forex trading courses today concentrate in teaching simple technical trading techniques such as pivots, chart formation, patterns etc. These techniques require total discretion and judgment from the trader using them and this is why most people don't succeed when trading them.

Second, Forex Trading Machine is not just a trading course, it is a complete trading **SOLUTION**. You will be equipped with 3 explosive forex trading strategies so you can attack the forex market from every angle. Each strategy is different and takes advantage of different opportunities.

Some of the digital trading courses I purchased are only 50-60 pages long, why is Forex Trading Machine a +150 page eBook?

Many people are completely new to the forex market and so the +150 page e-book will provide them all the necessary tools they need to be successful traders. From trader's psychology, unique money management formulas, to calculating currency values and reading a currency chart Forex Trading Machine is a complete learning tool for even the most inexperienced trader.

Also, it is important to understand why these mechanical PDFT systems you will learn work as they do, the logic behind them. After reading Forex Trading Machine you will not only learn to trade these amazing strategies but you will know exactly why they work.

Will I learn to swing trade or daytrade?

Q: You will learn BOTH, 1 swing trading system and 2 daytrading systems. The swing trading system, Forex Cash Cow, is designed to take advantage of a unique swing trading opportunity (lasting 1 to 2 days) that occurs several times each month. The strength of this system is accuracy. To achieve high levels of accuracy it is necessary to take advantage of trading opportunities that do not occur every single day.

The daytrading systems, Forex Runner and Forex Flip & Go, are designed to take advantage of certain market opportunities that occur every day in several currency pairs. Each of these trading systems exploit completely different opportunities.

What types of indicators are used to trade the 3 systems you teach?

None! No moving averages, pivot points, oscillators, volume analysis, trend lines, Fibonacci or Gann analysis, news, support or resistance, reversal bars, patterns such as: head and shoulders, double bottoms/tops, pennants, triangle formations, or price channels.

Forex Trading Machine is a truly revolutionary method of trading the forex market (using my proprietary PDFT method)

Q: never revealed before!

Is it hard to learn and implement the trading strategies you teach?

Most people that purchase Forex Trading Machine start trading the 3 strategies taught in the course the next day after they read it.

Q:
